Policy Document

Internal Audit Testing Schedule

- 1 The council has determined the scope and coverage of the work to be carried out by internal audit in accordance with proper practices guidance. Internal audit testing of internal controls will be sufficient for the proper completion of the annual internal audit report. The annual internal audit report should provide an adequate level of assurance for the council to complete assertions 2 and 6 in its annual governance statement.
- 2 In completing the annual report at section 4 of the annual return, internal audit will have planned and carried out the work necessary to give the assurances called for. The ten key control tests in the annual report represent the minimum level of internal audit coverage required.
- 3 Internal audit work always requires the application of judgement and should only be carried out following risk assessment. The scope and frequency of testing should reflect that assessment, and therefore should always be in proportion to the likelihood of fraud, error or miss-statement that could occur. It should be directly related to the size and level of business activity of the council.
- 4 The following schedule will provide assurance that the minimum level of coverage has been met.
